

**Smart Distance  
Awareness Device**

# The About us

## **Who we are**

Five seasoned entrepreneurs brought together by a mutual investor decided that unprecedented times require unprecedented solutions. Jointly they went on a mission to make the six feet society a pleasant one. Along the way, more entrepreneurs and investors joined the team to create something amazing.

## **What We Do**

Aura Aware creates technology enabling the 6 foot society

We empower humanity to come together- at exactly the right distance

Not by locking-up or creating physical barriers

But by preserving awareness, causing alertness and offering a third eye, which respects social distance

Society may lose its hugs, handshakes and the encouraging tap on the shoulder

But it will never lose its dignity

Aura aware will make sure of that

# Keep a strong customer experience

## Help your customers

The human mind is far from used to the distance we are told to keep these days. Your customers still love interaction and are now more than ever craving for a kind service and positive experience. Keep an open and friendly environment while remaining a safe distance. Help your customers understand at what distance they should communicate with your staff and provide them the service level you are known for!

## Protect your employees

For all of us, these are challenging times. Your employees are facing an uncertain and difficult period. They need to feel safe and should be able to provide the best help and service possible. Having to remind customers all day long to take a step back is exhausting and keeps them from focussing on their job. Show them that you care about their safety and give them the tools to create an outstanding customer service.

**“Aura Aware helps me to focus on a friendly service and strong customer experience, instead of reminding people to keep a safe distance all day long.”**

Karen - Airport Information Desk Employee
