

INSTRUCTIONS

Content Manager for UL Series LG Monitors

LG's UL3J commercial monitors come with **Content Manager**, an embedded media player and scheduler that allows you to directly add content to the digital signage with a USB drive or remotely. Manage or play your content playlists, Supersign content, templates, and images and videos all from the Content Manager.

Launching the Content Manager App

1. Load your content onto a USB drive and plug it into the USB port on the back of the digital signage.
2. Press the **Home** (↑) button on the remote control to launch Content Manager.
3. View, add, or edit your content playlists, select schedule content using the Scheduler, or play content using **Continuous Play** mode.

Continuous Play:

- a. Select content type from the tab on the left, then select your desired content.
- b. Click **Play** in the upper right-hand corner of the screen.

To access the Content Manager remotely or for more detailed instructions, please contact Displays2go.
