

# Nano Blue Light Atomizer

## Product parameters

Item number: Ds350

Weight: 900g

Rated power: 10W

Power Supply Voltage: DC12V

Duration: 3 hours

Product Size: 22\*21cm

Voltage:110-240V 50HZ

Battery capacity: 2600mAh

Charging time: 2 hours

Water bottle capacity: 800ml

The charging nano-blue light atomizer needs to be fully charged before use, each charge takes two hours, can be used continuously for three hours, before using the container, the bottle is filled with diluted disinfectants and alcohol, then the screw of the gun is screwed and adjusted to the amount of spray needed, and the space or object that needs to be sterilized is sprayed, filled with a container of liquid can be sprayed for 6-8 minutes, you need to continue spraying and then add another container of liquid can be added, matters needing attention, this machine in the work to open the copper nozzle to adjust the size of the fog to be careful, to prevent the copper nozzle small copper needles washed away.
