Safety & Care Information

Before beginning assembly, please take time to read through the instructions and understand each step thoroughly. Displays2go is not responsible for any personal injury or product damage due to mishandling, incorrect mounting, incorrect assembly or incorrect use of this product.

 Wear the included gloves to protect your hands during assembly!

 The weight capacity of the convertible countertop is 22lbs.

Fabric Graphic Care Instructions: Machine wash with cold water on a gentle cycle and use a mild detergent. Do not use bleach. Tumble dry on low. Fabric must be completely dry prior to storing. A steamer may be used to reduce wrinkles and fold lines after the graphic is on the frame.

product page.

Backwall Assembly

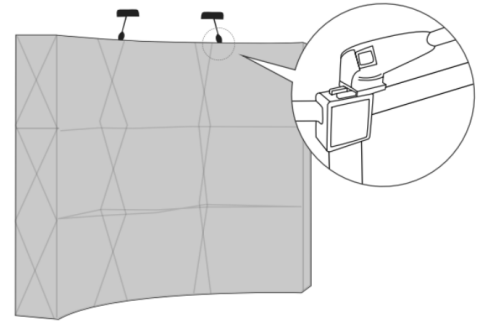

1. Pull to extend the frame.
2. Connect all internal supports.
3. Lay the fabric graphic flat over the frame and wrap around to the sides. Make sure the LED light connectors face the front and top of the unit for correct orientation. Connect the graphic via hook-and-loop strips.

⚠ **NOTE:** The fabric graphic can remain on the frame for easy disassembly. Disconnect all internal supports, then carefully compress the frame, making sure no hook-and-loop strips are caught in the frame.

Overhead LED Light Installation

Slide the notch of the LED Light into the notched connectors of the frame. Plug in the power cord and flip the power switch to ON.

Storage Case to Counter Conversion

1. Place the half of the case with wheels on the ground.
2. Twist the 4 support poles into the holes on the lower case.
3. Lower the top case onto the poles.
4. Place the tabletop onto the case with the lip facing up.
5. Slide the custom fabric graphic over the entire counter.

Assembly is complete.
