IPDAU2BBNR (15" Banner Stand)

IPDSAUJ33 (33" Banner Stand)

IPDAUBNRPR (15" Replacement Banner)

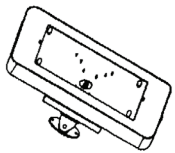

IPDSAUJ33GR (33" Replacement Banner)

Version 2.0

Components

Tablet Holder

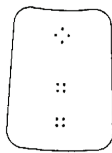

iPad Case

Key

M5x8
Screws (A)

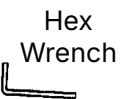

Base

M5x18
Screws (B)

Support Pole

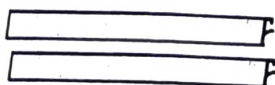

Hex
Wrench

Banner Stand

M5x20
Screws (C)

Banner Rails

Adjustable Banner Pole

1. Assemble the tablet holder.

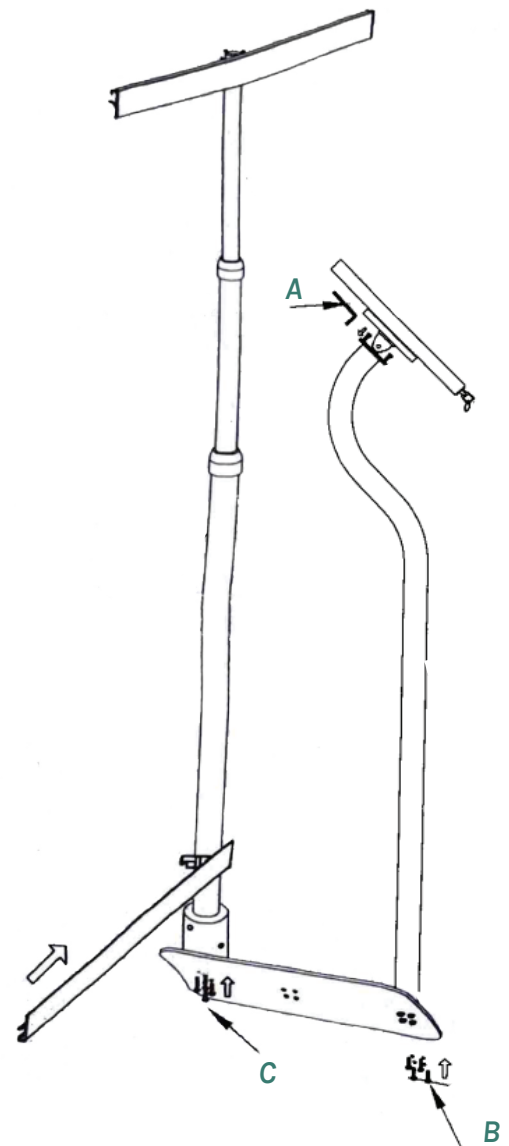

1. Using M5x18 (B) screws, connect the support pole to the base via the *front* screw holes on the wide end of the base.
2. Using M5x8 screws (A), attach the iPad case to the pole. Tighten with a hex wrench.
3. Insert your iPad into the iPad case, aligning it with the cut outs. Lock with the key.

2. Assemble the banner stand.

1. Using 4 M5x20 (C) screws, connect the banner pole to the base via the *back* screw holes.
2. Slide the banner rails onto the brackets of the banner pole, noting the correct orientation (see below).
3. Adjust the height of the bottom banner rail by loosening the 2 screws and sliding the rail into the desired height. Finger-tighten the screws to secure in place.
4. Twist the pole to adjust the height of the top banner rail.

How to Install the Banner

- Confirm the correct orientation of the top and bottom rails, then remove the double-sided tape from the rails.
- Carefully line up the edge of the banner with the rail, and press to attach it to the double-sided tape. For best adhesion, press down along the tape and wait 1 minute before hanging the banner.
- Re-insert the rails onto the banner stand. Adjust the pole height until the banner is taut.

Assembly is complete.
