

22" x 69" Black Poster Stand with Floor Standing, Top Loading Design

SKU: MFLF2269

Components

- Base (x1)
- Double-Sided Poster Frame (x1)
- Hex Wrench (x1)
- Frame Lens (x2)
- Frame Support (x1)
- Screw Cover (x6)

Version 2.0

Assembly

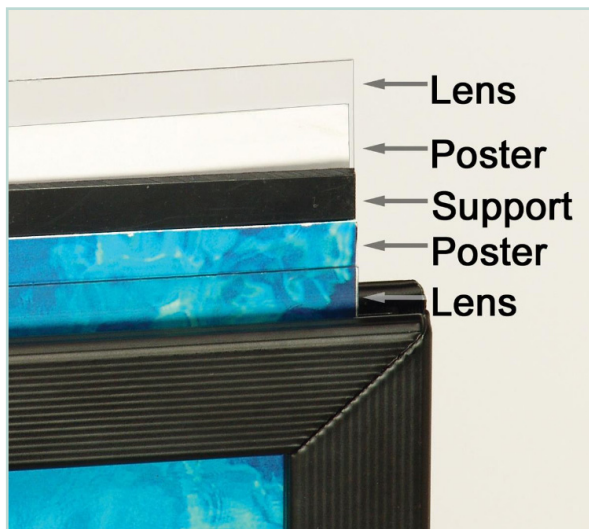

- **Before Assembly:** Remove packaging and identify hardware bag. Assemble on a soft surface to avoid scratches.

Step 1: Connect Base and Frame Legs.

1. Place the base on the floor.
2. Insert the frame legs into the base, aligning the screw holes.
3. Use the hex wrench to expand the interior shims connecting the legs and base. Tighten each set screw until the poster is fully secure with no movement.
4. Place the screw covers.

Step 2: Insert Posters into Frame.

1. Peel off the protective film from the lenses.
2. Place both posters against the support panel.
3. Place a protective lens on each outer side.
4. Slide stacked inserts down into stand via top slot of display frame. Each insert should be **completely** inserted into the bottom frame track.

==== Assembly is complete.
