Fabric Graphic Care Instructions: Machine wash, low tumble

Assembly

For easy assembly, each pole has internal bungee cords and numbered stickers corresponding to the diagram below.

1. Connect aluminum frame poles, securing push-buttons.
2. Connect all aluminum poles to assemble frame, twisting until fully tightened. Ensure screw holes for the monitor mount face outwards.

3. Find the 4 holes in the fabric graphic where the monitor bracket attaches to the frame.

4. Slide fabric graphic down to the bottom, pulling tight to align with the holes on the frame. Zipper to secure in place.

5. Attach TV brackets to your monitors with spacers and screws, referring to instructions included with the mounting kit.

6. Carefully hang monitor onto brackets.

Tip: For cable management, slice a ½" wide horizontal entry cut in fabric near the monitor cord and insert the monitor electrical cord between fabric layers, letting it fall to the base. Create an ½" exit slice to accommodate the best exit point for your use needs.

Assembly is complete.
