Shelf Adjustment Instructions

1. Place a shelf bracket at the desired height into the track at either end of the unit. Make sure both prongs of the bracket are firmly inserted.
2. Tilt the glass shelf into the display case and place it onto the bracket, holding the glass firmly.
3. Place a shelf bracket onto the center track, while carefully tilting the shelf above the bracket.
4. Slide open the other door and insert the next bracket into the track at the same height.
5. Check all bracket prongs are secure. Then carefully lower the glass shelf onto all 3 brackets.

Shelf adjustment is complete. If you have any questions regarding our products, please visit us at www.displays2go.com or contact customer service at 844-221-3388.
