Step 4
Top Level

Step 1

Invert (3) panels and insert **12" legs** (bottom panel) and **18" legs** (top and middle panels) into **oiled sockets** as shown. (Make sure legs are pushed all the way down).

Step 2

Set all panels in upright position and place **collars** over outside sockets in bottom and middle level panels. (Collars slide down onto sockets through grid directly over legs).

Step 3

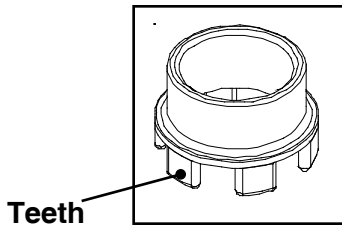

Position middle shelf on bottom shelf inserting legs into holes in collars as shown.

Step 4

Position top shelf on middle shelf inserting legs into holes in collars. (Make sure legs are pushed all the way down).

ASSEMBLY INSTRUCTIONS

2- Options to Secure Legs to Panels
