

Wood LED Illuminated Counter

Assembly Instructions

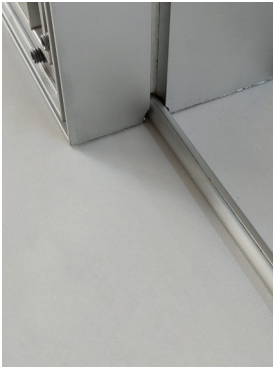

SKU: TBOXCNTSG
RPGTBOXCP

1. Get all the profiles out of the bag

Scan QR code to visit product page

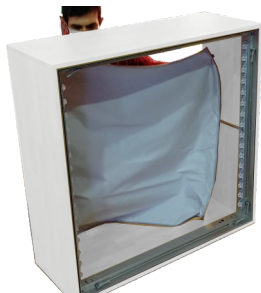

2. Insert corner profiles together and turn holders to tighten.

3. Beginning with the base, insert wood pieces into metal rods on the body. Slide the one side in next. To finish the box, slide the top piece most of the way in, then fit the second side piece against it to form final corner.

slide the top piece to the side and drive the side piece into the channel

4. Install the light-reflecting fabric from the back side of the product.

5. Insert the shelf into the slot inside the table.

6. Install the printed fabric to the front face and plug in the cable.
