# PRODUCT INFORMATION

## PARTS LIST

---

---

54 Wood blocks  
Clock Timer

### NOTE:

One (1) AA (1.5v) Battery is required for use in timer.  
Battery is not included.

### WARNING:

Keep in mind that you should be aware of any children playing nearby, as falling blocks could cause injury.

## ABOUT THIS GAME:

This game combines all the fun of a classic board game with the heart-pounding action of timed play. Compete head-to-head with your opponent in a nail-biting race to carefully remove blocks and restack the removed block at the top of the tower without compromising its ability to stand. The first player to topple the tower or run out of time on the time clock loses the game.

# SET UP INSTRUCTIONS

## TOWER SET UP

One person chooses a hard, flat surface to start building the Tower. To set up the game, lay 3 blocks next to each other, along their long sides, on a hard surface to complete the first row. Start the next layer by placing 3 more blocks next to each other at a right angle to the blocks on the previous row. Continue doing this, building layers of 3 blocks, until all the 54 blocks are stacked.

## TIMER SET UP

1. Insert 1 AA (1.5v) battery in compartment in bottom of timer.
2. Turn the clock ON, by switching the ON/OFF switch to ON, on the bottom of the timer. Once on, the screen will display 0:00:00. The clock will be in a positive timing position when turned on. To change the timer to a countdown timing screen mode, press the middle button for 2 seconds.
3. The hour button for Player 1 will now be flashing, change the hour to 0 by continuously hitting the – button, until the clock says 0. Briefly touch the middle button again and the minute button will start flashing. Set the number of minutes you want each player to have, by touching the + or - sign to get the desired number. Repeat these steps until all numbers on the clock have been set. Once the last digit is chosen, hold the middle button for 2 seconds again to lock in your desired playing time. The lower the time you set on the clock, the faster the game needs to be played.
4. Turning the clock off and on again sets the clock back to the last time. In order to get back to the factory setting, briefly take out the battery.

## GAME PLAY INSTRUCTIONS

The player who stacked the tower goes first. Play then passes to the left.

*Let's get started!*

### ON YOUR TURN

1. The first player starts by adjusting the rocker switch to the up position on the side they are playing on, and then pressing the middle button which starts the countdown. This signals the start of the play.
2. Player must quickly remove one block from any level of the tower below the highest completed story, using only one hand at a time; either hand may be used, but only one hand may touch the tower at any time. You may touch other blocks to find a loose one, but if you move a block out of place, you must fix it using only one hand before touching another block.
3. The removed block must now be placed on the top of the tower at right angles to the blocks just below it.
4. The turn ends when the player successfully places the removed block on top of the tower and strikes the timer, switching the countdown to the other player's timer.
5. The next Player's turn immediately begins and the Player repeats steps 2 through 4. The players keep taking turns in this manner.
6. The game ends when either the tower falls or one of the players' timer runs out. The player who makes the tower fall or whose timer runs out sets up the tower for the next game.

*Good luck!*

## MAINTAINING YOUR TOPPLING TOWER

- Keep the timer away from hot sun or high temperature to avoid the display turning black.
- Keep away from corrosive liquids and hard-object impacts.
- Keep away from high-static objects, such as screens.
- When not using the clock for a long period of time, remove the battery.
