product page.

NOTE: For best adhesion, mount frames to clean, dry windows with an outside temperature over 55° F.

1 Peel the protective film from both sides of the snap frame.

2 Peel the paper backing from the mounting tape on the snap frame.

3 Mount the snap frame on the inside of the window. Use a level to make sure the snap frame is straight. Next, go outside to finish the exterior assembly.

4 Peel the paper backing from the tape on the snap frame cover. Line up the cover up with the snap frame.

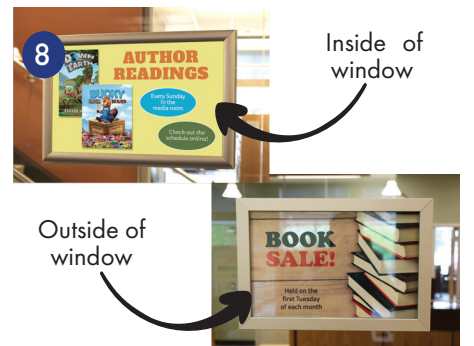

5 Adjust the cover so it lines up with the inside frame on all sides. Press to mount to the outside of the window.

6 Stack your signs, with the signs back to back and the protective cover in front of them.

7 Snap the sides of the inside frame open. Insert the stack of signs and the protective cover. Flip the snap frame shut.

8 Your Window Snap Frame is complete. To change your signs, snap the inside frame open and remove the signs and cover, insert your new signs and the cover, and snap the frame shut.
