Version: V5.0
Play time of earbuds: 5H
Charging for earbuds: about 40 min
Capacity of charging case: 500 mAh
Charging for case: about 2 hours
Input of charging case: 5V/2A max
Output of charging case: 5V/1A max

02

operational approach :

Headphone pairing: open the charging case, at the same time remove the left and right headset, at this time the headset on the LED blue light flashes, the left and right headset at the same time prompt "power on waiting for pairing", voice after the end of the headset red/blue light will alternately flash. At this point, the left and right headset pairings are complete. Turn on your phone's Bluetooth search "D3" and connect to headset, with a "connected" voice prompt in the headset. If the device is not connected for 5 minutes, the headset will automatically shut down.

Pause/Play Click the left/right button to pause/play

Previous/Next Song

Double-click the right headset to change to the next song, double-click the left headset to change to the previous song.

03

Answer/hang up the call:

When there is a call in, any click on the button of the left and right headset can be answered, and any click of the left and right button during the call can end the current call.

Headphone charging:

Put the headset into the battery compartment to close the charge compartment cover, the headset will automatically shut down and enter charging mode (at this time the charge red LED lights up), after the charge is completed, the blue LED will briefly light up, if not operated, the blue LED off to reduce battery charge. To use it simply remove the headset from the battery compartment.

Single-ear mode:

When you remove a single headset from the charging compartment (the other headset is off or charged), the headset lights up blue and then the red/blue light flashes alternately, which means that the device to be matched, you can turn on the bluetooth search function of the device, the search list will display the "D3" headset name, click on the connection. After using the one-sided headset, if you use both ears again, turn on the other headset directly and connect the headset back to the other side of the headset. Both ears are ready for use.
