- ⑥ USB Output 2

## How to Use

### Charging Your Blade 8000W

1. Insert USB cable USB A end into power device.
2. Plug power device into DC power socket.
3. Plug the MIC end of the Micro USB cable into the input port of the product. The blue light flashes to indicate the current power level.

### Battery Indicator

● 1	● 2	● 3	● 4
0%-25%	25%-50%	50%-75%	75%-100%

The purple light is on, indicating wireless charging standby.

### Indicators:

- Purple light on: wireless charging standby
- Blue light flashes: charging
- Blue light Blink: discharging
- Blue light on: current power level
- Green light on: wireless charging
- Purple and green light fast blink: abnormal operation

## Charging Your Device

1. Insert the USB cable USB A end into output 1 or output 2.
2. Plug the other end of the cable into a terminal such as a mobile phone.
3. Click the switch button and the power is discharged to charge the terminal such as a mobile phone and the blue light flashes. The purple light is on, indicating wireless charging standby.

USB port schematic for regular charging and discharging

### Wireless Charging and Discharging

1. Make sure there is no any clutter on the product.
2. Click the switch button and the purple light is on, indicating wireless charging standby to charge the terminal such as a mobile phone.
3. Place a mobile phone or other compatible device that complies with the Qi protocol on the Blade8000W to achieve wireless charging. Note that the center of the mobile phone's receiving coil must coincide with the transmitting coil of the product, and the green light indicates wireless charging.

## Accessories:

- Wireless power bank\*1
- Micro USB charging cable\*1
- User manual\*1

## Warning

### Remarks:

It's normal that this charger and your smart phone will be hot under operating conditions, and it may be more hotter when charging and using at the same time (such as looping music).

### When your wireless power bank works improperly

1. Make sure there is no any clutter on the wireless transmitter.
2. When the wireless power bank is over-heating, take your mobile device away from your wireless power bank. And the transmitter will stop charging automatically when over-heating. Please try charging again when the wireless power bank cooling down.
