-Flat/Phillips Screwdriver

Scan QR code to visit the product page:

1. Place the back panel (A) on a soft work area. Slide 1 side panel (C) into the groove from the top of the back panel (top has no feet) on one side. See below:

Slowly slide it all the way to the bottom until it stops.

2. Slide the 2nd side glass panel (C) into the groove on the other side of the back panel. Slowly slide it all the way down as in Step 1.

# ASSEMBLY INSTRUCTIONS

## DCKDMT - Floor Standing Metal Display Case - Single Door

3. Hold the front panel (B) and slide both side panels into grooves in the front panel. See the images below:

5. Place one wood board (F) at the bottom inside the display case. Adjust pegs inside the display case so that all 4 pegs holding the same glass shelf are on the same level. Carefully place 4 glass shelves (D) on the pegs.

Adjust pegs inside the display case so that all 4 pegs holding the same glass shelf are on the same level. Carefully place 4 glass shelves (D) on the pegs.

4. Carefully lift the assembled display case to its upright position. Unlock the top and open the front door, place the power adapter (E) inside on the floor. Connect all the cables from the metal frame to the center hub as shown below.

6. Place the 2nd wood board (F) on top of the display case.

Slide 1 peg (H) into the slot in a corner post, then tighten them with a screw driver. Do this at all 4 corners.

Insert 1 plastic cap (G) into 1 corner post. Finish the assembly by doing this for all 4 corners.
