

ENVIRONMENTAL SUSTAINABILITY

A PILLAR OF DISPLAYS2GO'S CORPORATE RESPONSIBILITY PROGRAM

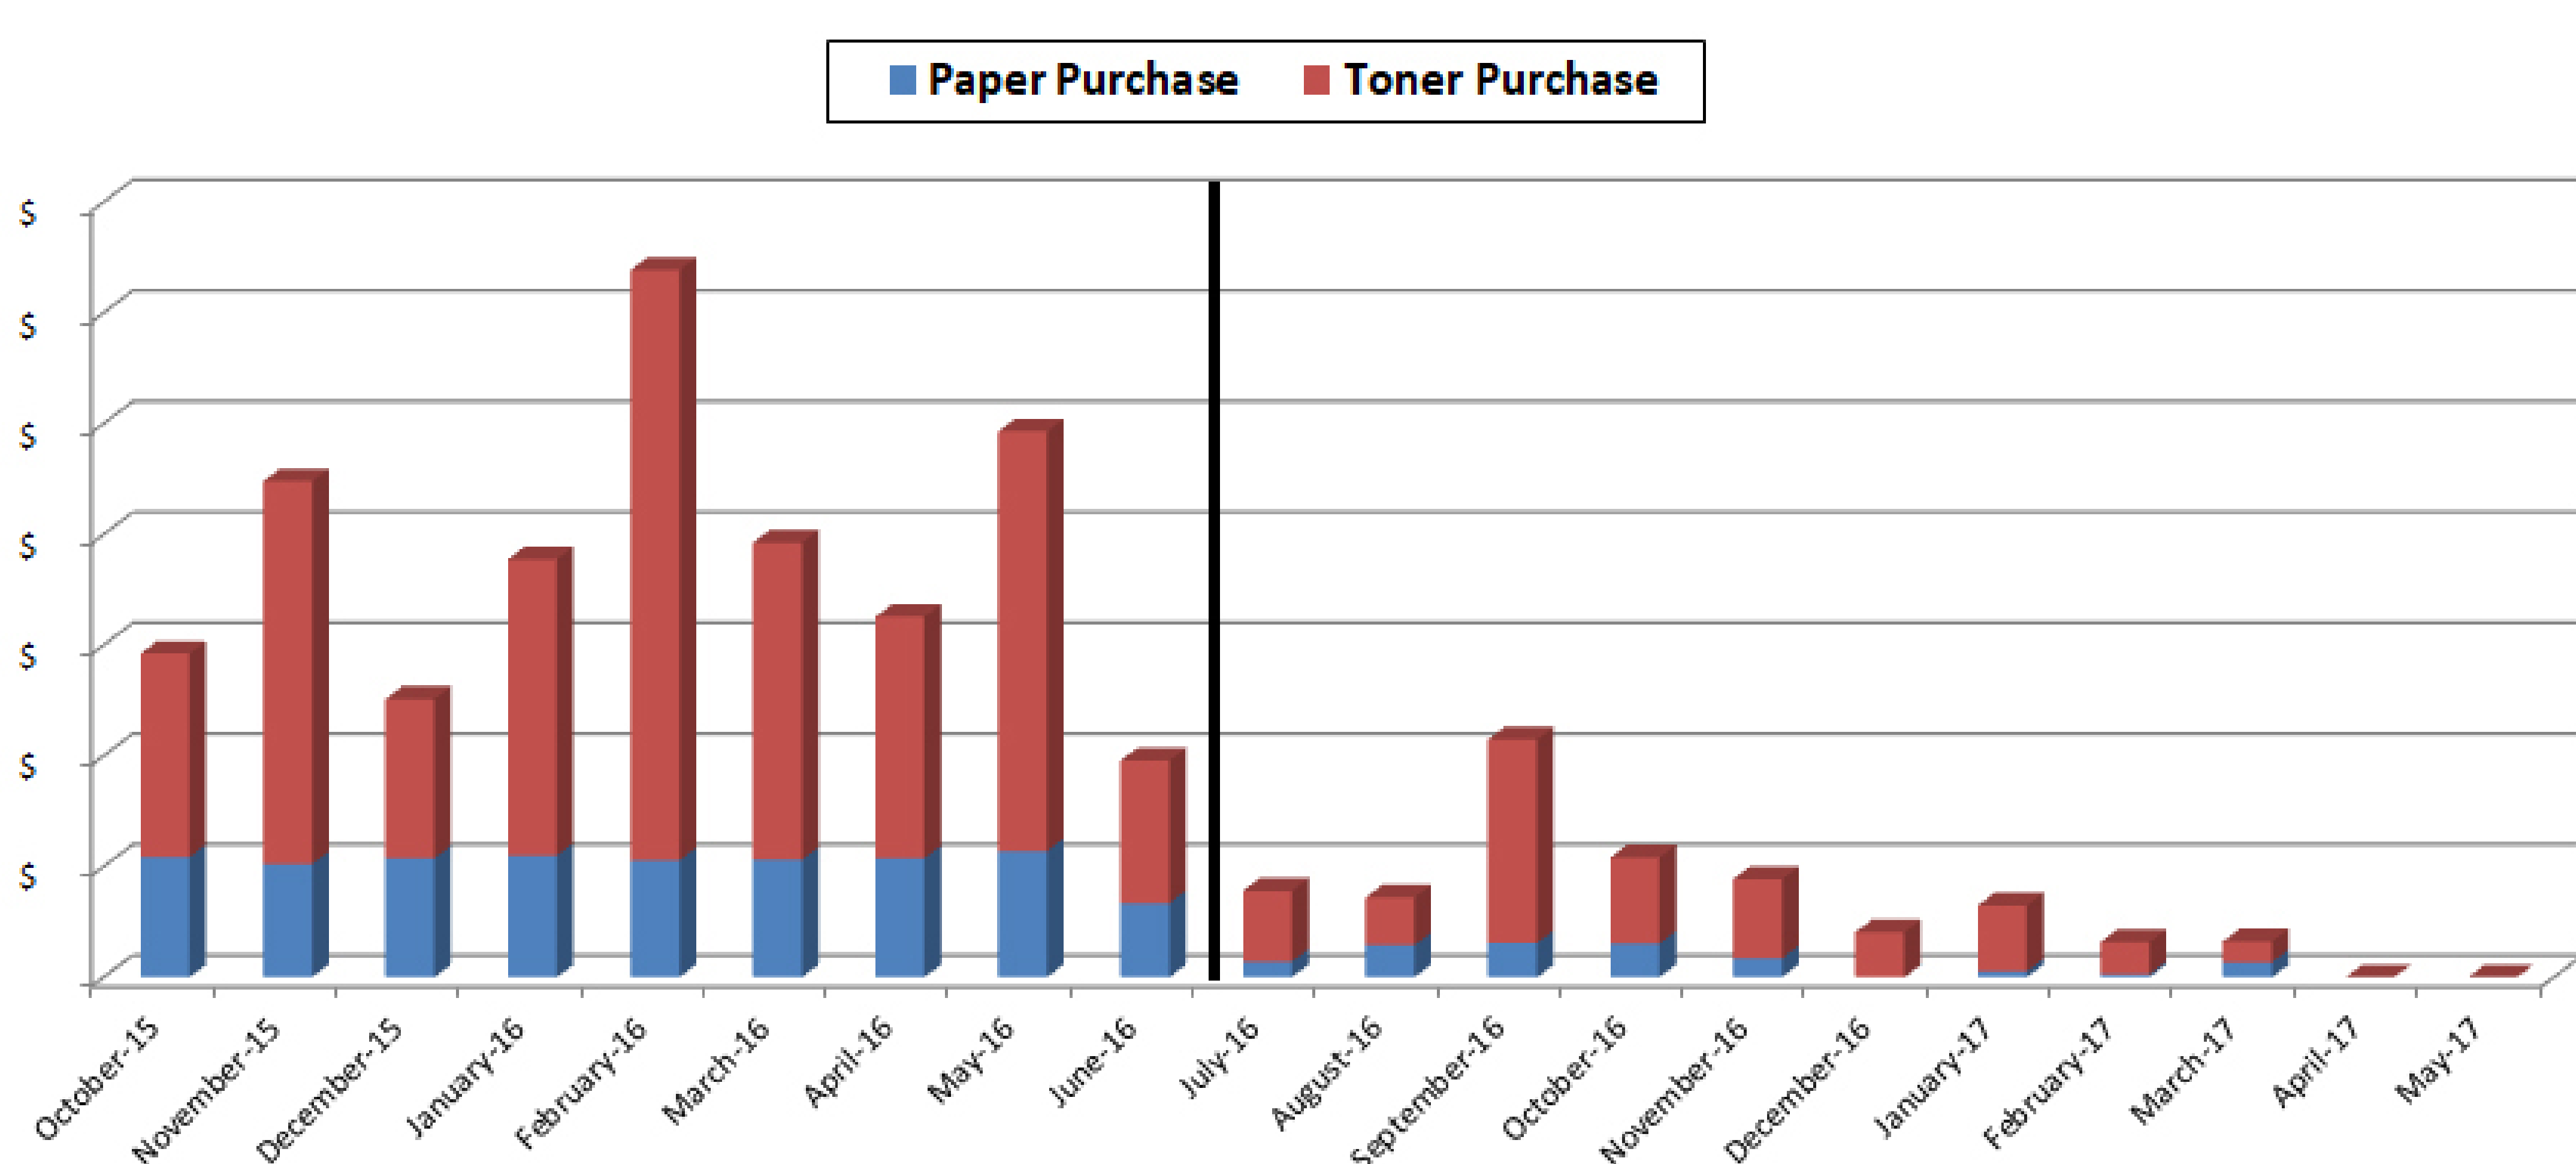

PAPER & TONER REDUCTION

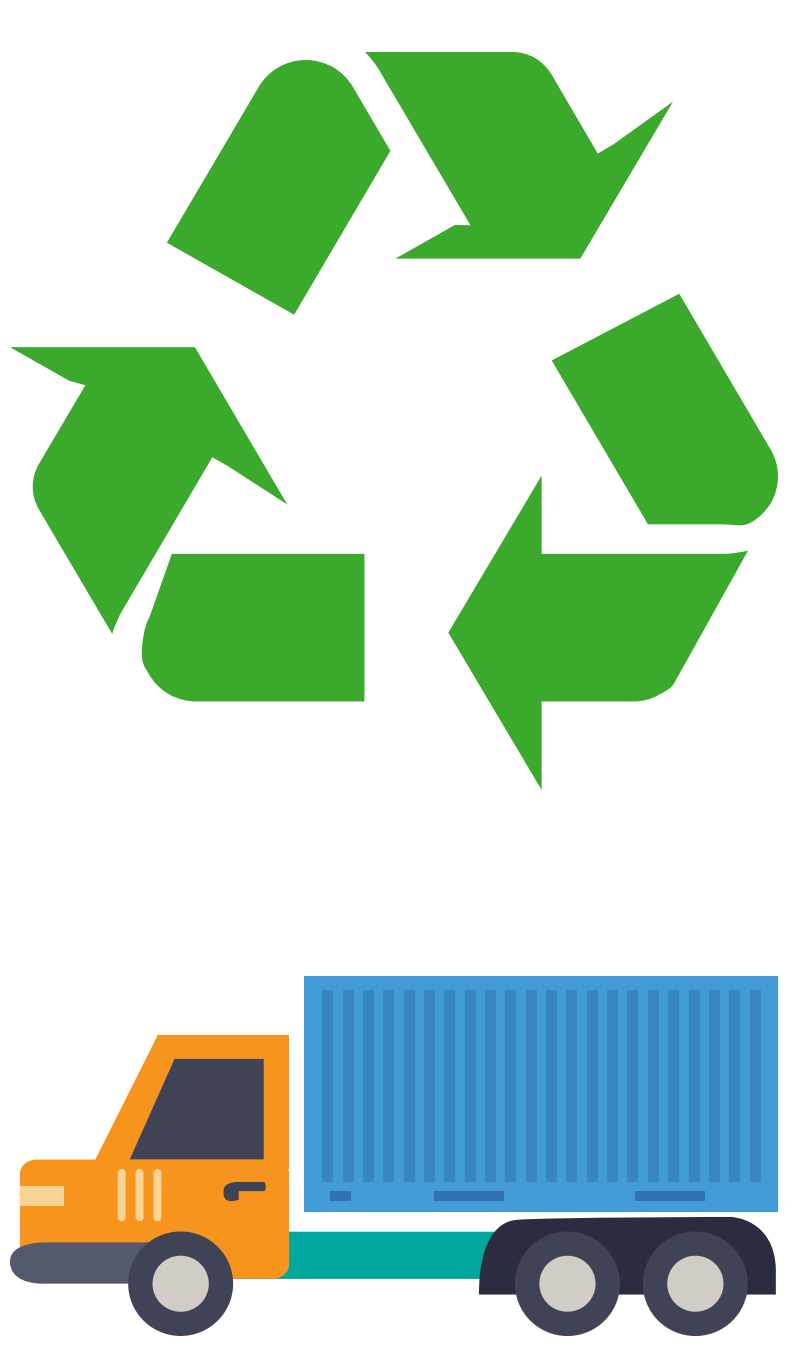

"ONCE THE NEW ERP SYSTEM WAS IN PLACE, WE WERE ABLE TO REWORK OUR SYSTEM"

- KAREN PELLETIER, CONTACT CENTER OPERATIONS MANAGER

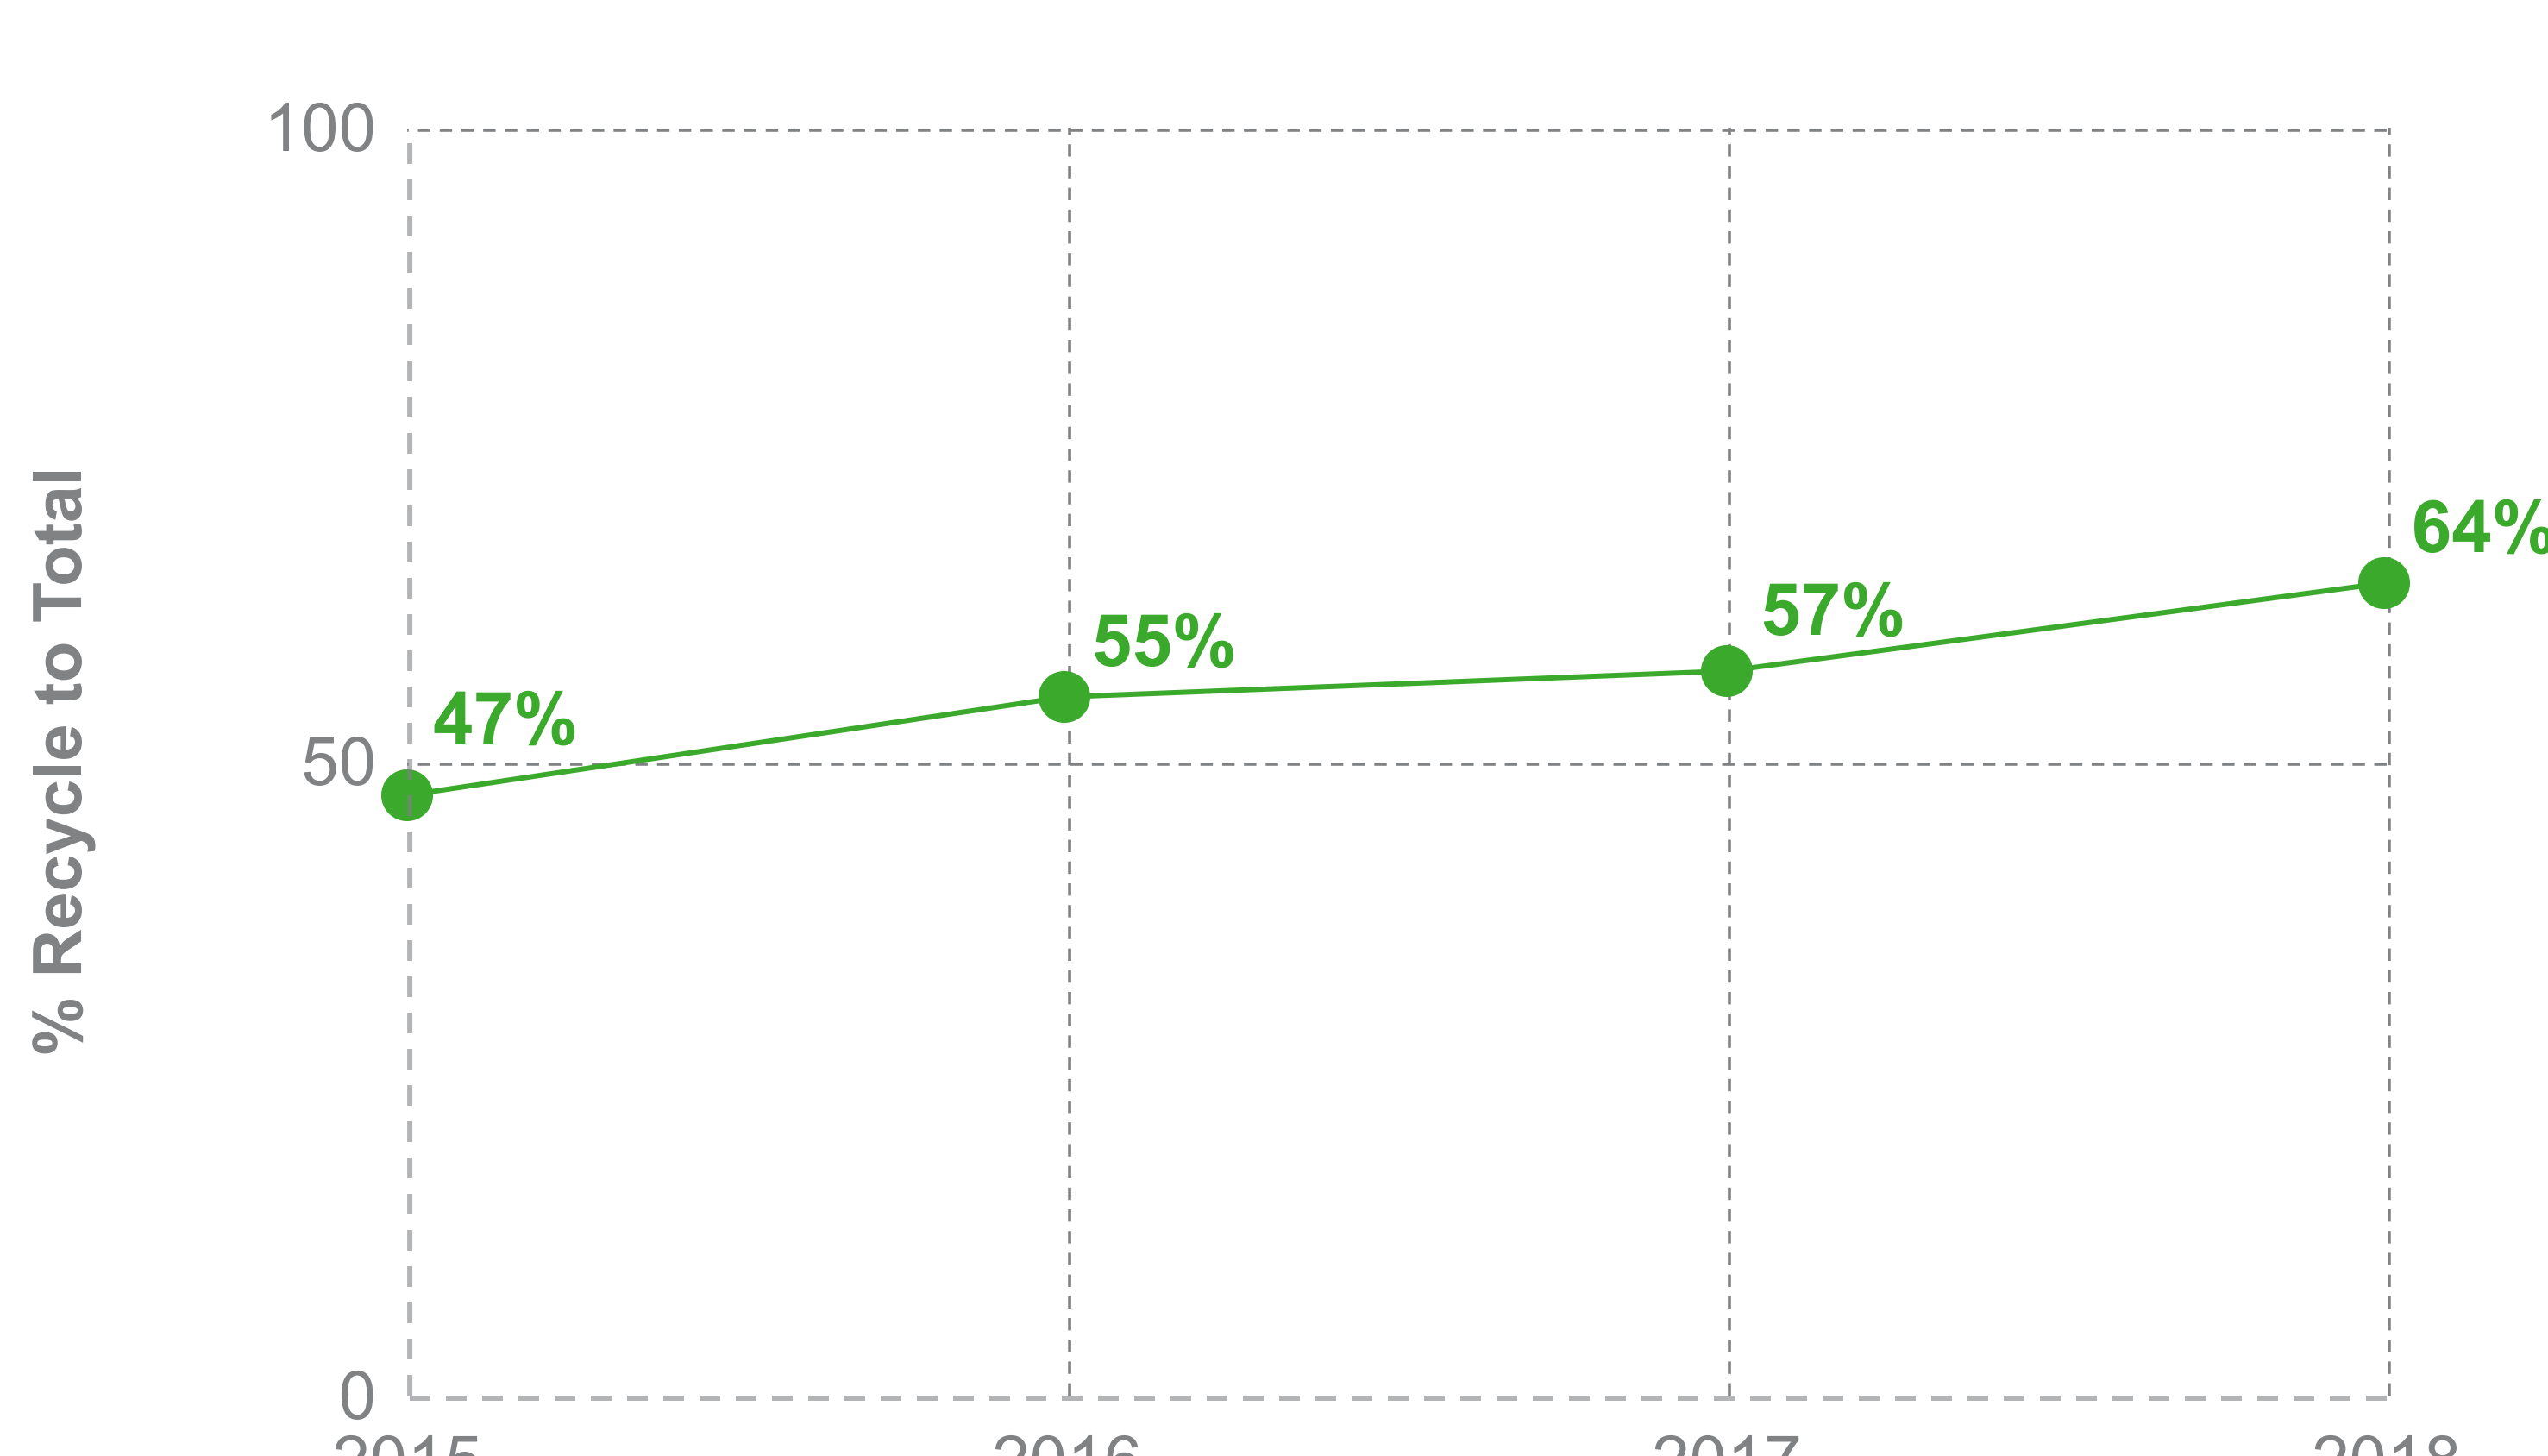

"...Each year over 350 million cartridges are thrown out. Approximately thirteen cartridges are discarded every second, in the U.S. alone... The problem gets even worse considering that each cartridge becomes 3.5 pounds of solid waste sitting in a landfill and can take up to 450 to 1000 years to decompose, as it includes mixed resin, one of the most difficult plastics to recycle."

RECYCLING EFFORTS

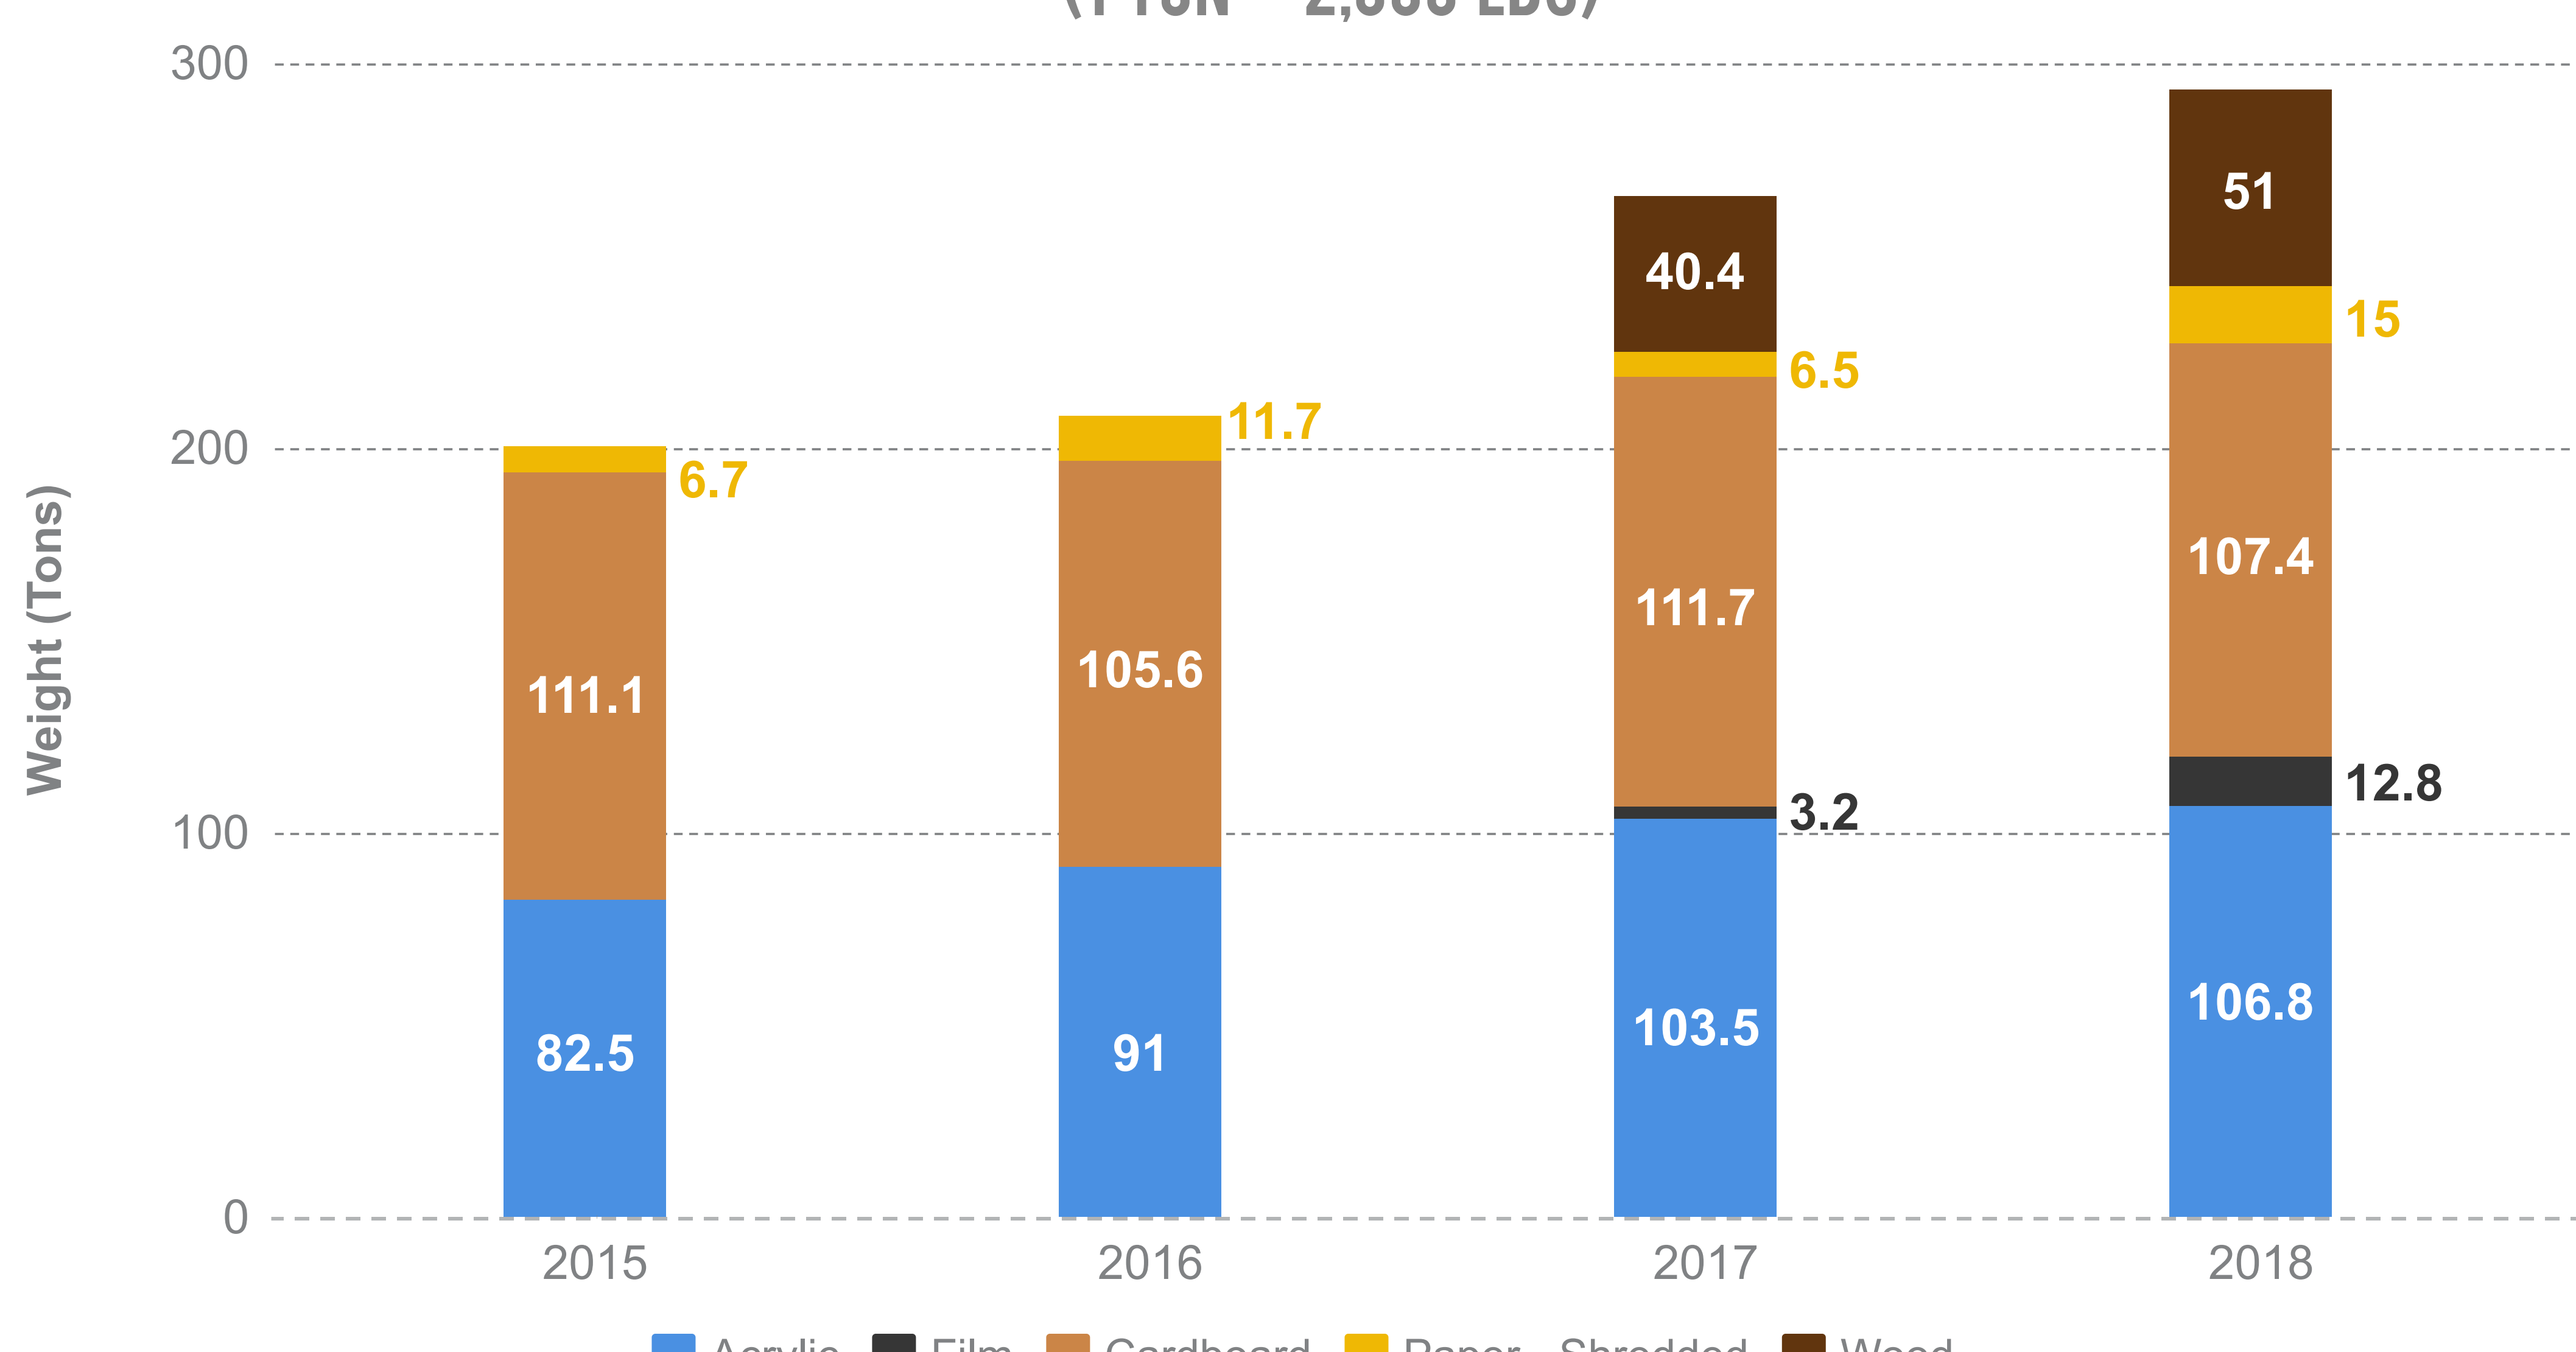

64% MATERIALS RECYCLED IN 2018

RECYCLED MATERIALS

(1 TON = 2,000 LBS)

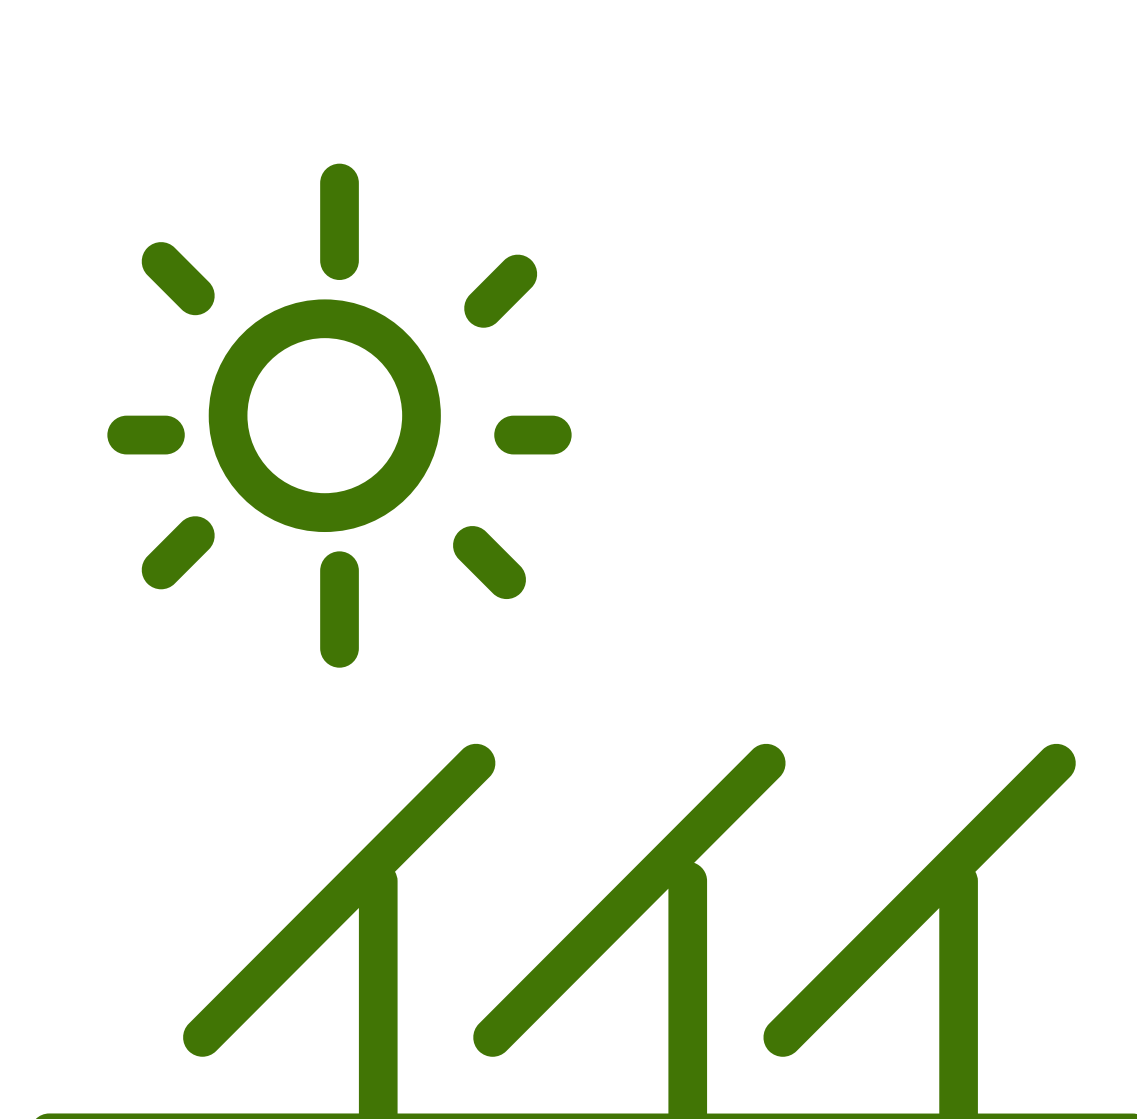

MINIMIZING ENERGY CONSUMPTION

97% CONVERSION TO LED LIGHTS

40% REDUCTION OF ENERGY CONSUMPTION

SETTING A SOLAR STANDARD

"ONE OF THE CONTRIBUTING DRAWS TO THE NEW FACILITY WAS THE EXISTING SOLAR PROGRAM"

- BOB BLACK, DIRECTOR OF MANUFACTURING & FACILITIES

300,000 Sq. ft. of solar panels

3,600,000 kWh of electricity annually

enough to power 720 standard sized houses
