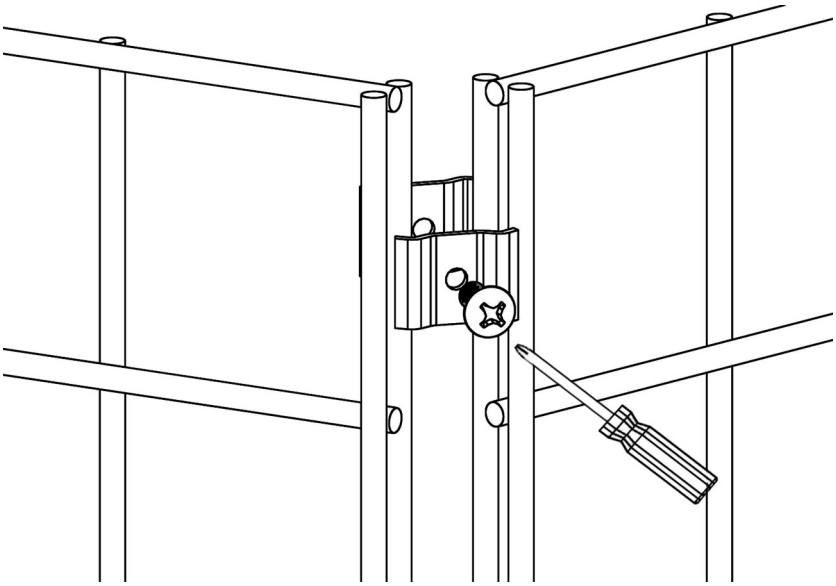
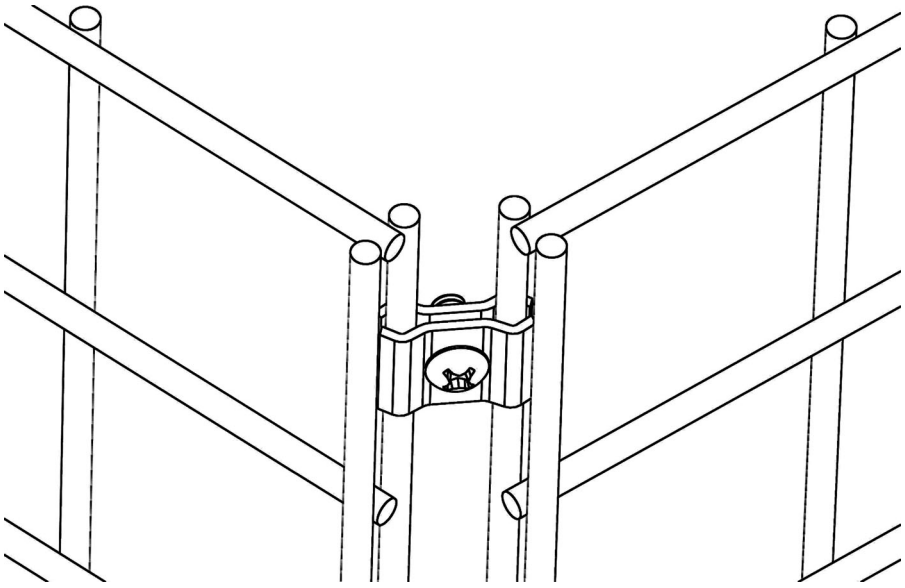
ASSEMBLY INSTRUCTIONS

GRIDWALL CONNECTOR - GRDCON

① Move (2) gridwall panels* that need to be joined close to each other.
Unscrew the connector to separate (2) clips. Clamp side wires on grid panels with (2) clips, then use a phillips screw dirver to tighten the screw back to the center of the connector.



*Gridwall panels sold separately.


② Install all the gridwall connectors and set the panels at the angle as needed.
NOTE: (3) or more connectors are recommended for every (2) panels being connected. Evenly space the connectors along the edge of the panels.
