

High Rise Tension Fabric Funnel Tower Assembly Instructions

<p>Assemble frame by connecting numbered push pins in to corresponding numbered locks.</p>		
<p>When the push pin pops back up through the corresponding numbered hole, the frame is locked in to place.</p>		
<p>Assembling the frame may take two people, and is best done with the frame laying down sideways. Install the middle ring once the outer frame is assembled.</p>		
<p>Once assembled, pull the graphic banner up starting from the bottom, and Velcro bottom circle into place.</p>		
<p>The graphic banner will be pulled tight to ensure no wrinkling, and will require two people for proper assembly. The tension fabric material used is durable and expand. It will stretch to fit on frame tightly, it is best to attach and spin the hardware around while pulling the fabric tight.</p>		
<p>It is easiest to install the graphic banner when the frame is laying down sideways.</p>		
<p>Once the graphic banner is pulled tightly, and has been Velcroed to the top and bottom, stand the display upright.</p>		

High Rise Tension Fabric Funnel with the 85.6”W as the base
