

EVERYTHING YOU NEED TO KNOW ABOUT YOUR INTERACTIVE WHITEBOARD

What you need to get started...

Congratulations, you just upgraded your whiteboard!
Now for the fun stuff, let's get your interactive whiteboard set up and ready to go so you can transform routine meetings into collaborative work sessions! Here's what you'll need to get started.

- Projector
- Software
- HDMI Cable

What you don't need...

This is **not** a dry-erase whiteboard surface and is not compatible with any type of dry erase marker.

It's Not Your Average Whiteboard

Transform your classroom or conference room into a hub for collaboration and team activities. This innovative product features interactive elements that enable your team to get engaged like never before.

- 86" Display Size**
- 10 Point Touch Technology**
- 16:10 Aspect Ratio**
- HDMI Connectivity for Simple Plug & Play Content**
- 8ms Response Time**
- Infrared/Optical Imaging Touch Technology**
- Digital Ink Smart Pen**
- Exclusively Compatible with Windows 10**

How It Works

Our interactive whiteboard is available in two versions; wired and wireless. Depending on your placement and needs, choose the one that works best for you!

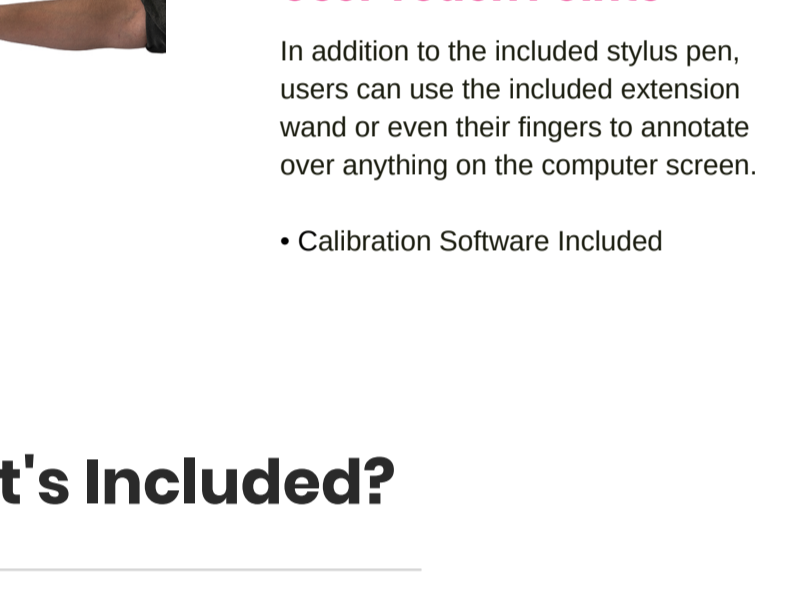

Wired Connectivity

The wired unit needs to be connected directly to a laptop via USB and the PC needs to be connected to the projector by HDMI cable.

Wireless Connectivity

The wireless unit requires the PC to be connected to the wireless stick, which has both HDMI and USB ports. The board needs to be connected to the projector by HDMI cable. Make sure the board is plugged into a power outlet.

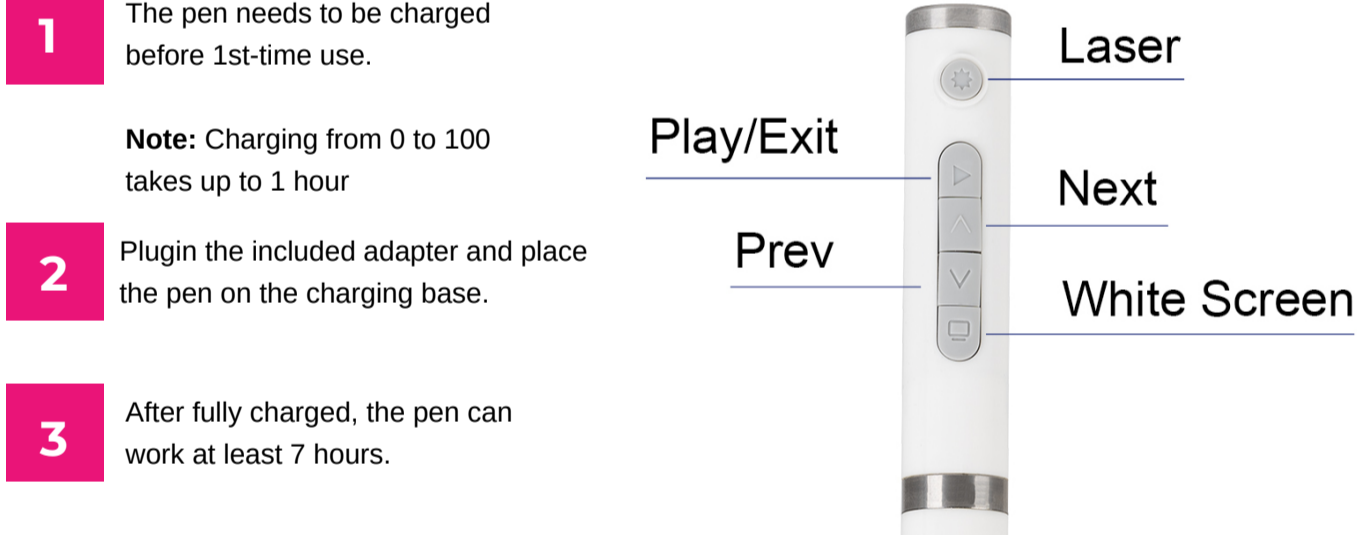

Calibrate For Multiple User Touch Points

In addition to the included stylus pen, users can use the included extension wand or even their fingers to annotate over anything on the computer screen.

- Calibration Software Included

What's Included?

1. Wireless HDMI & USB Stick (*wireless unit only*)
2. Smart Pen Charging Base
3. Retractable Presentation Pointer
4. Pressure Sensitive Smart Pen
5. Wall Mounting Hardware
6. Calibration Software
7. Smart Pen Charging Adapter

How does the pen work?

Charging:

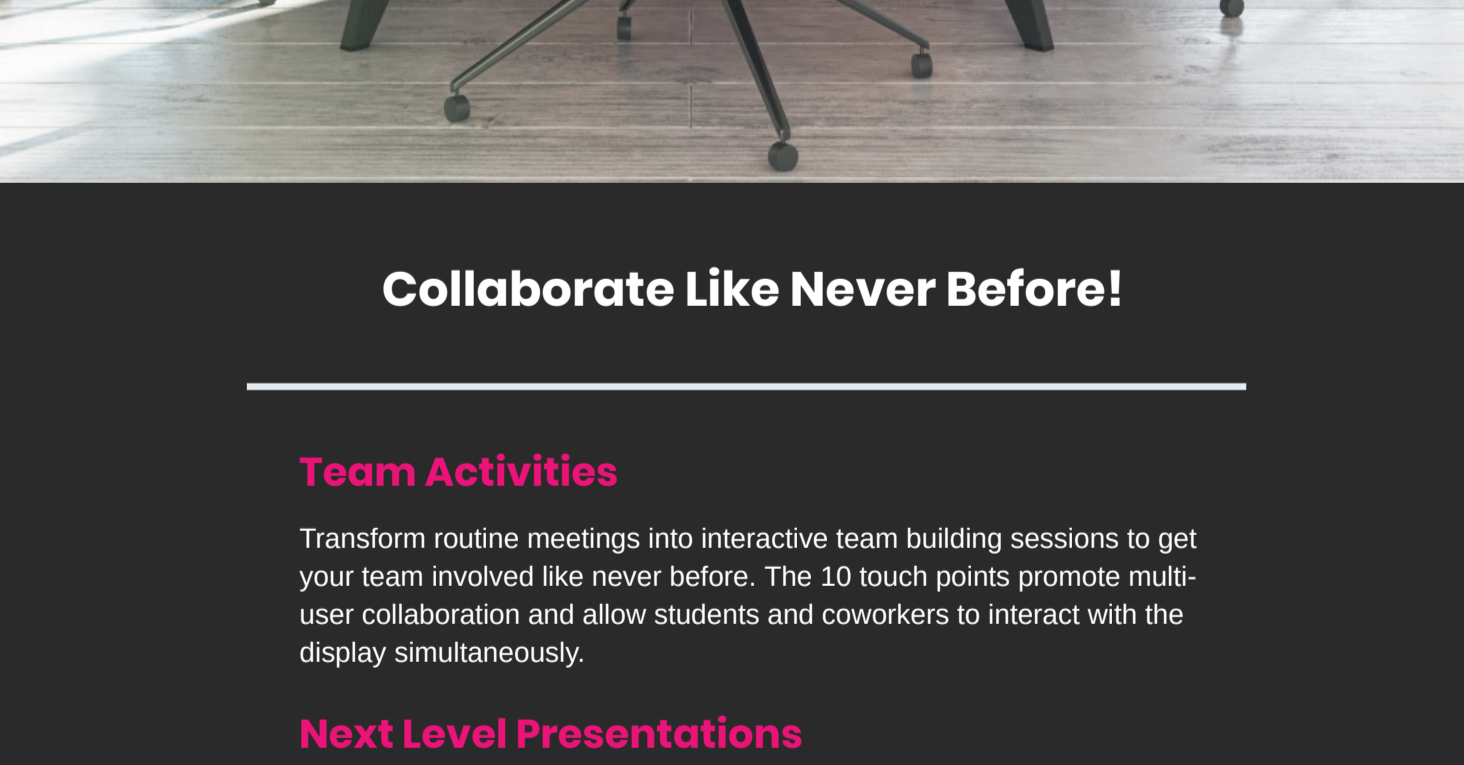

- 1** The pen needs to be charged before 1st-time use.
Note: Charging from 0 to 100 takes up to 1 hour
- 2** Plug in the included adapter and place the pen on the charging base.
- 3** After fully charged, the pen can work at least 7 hours.

Pairing:

- 1** Start your PC or whiteboard then check the pairing status of your smart pen.
Note: The tip will light in blue if the pen paired successfully.
- 2** If not paired (no light), press the "White Screen" button and "Play/Exit" at the same time for 5 seconds to restart the pen.
- 3** Press the "Eraser" button to light the tip, the color will indicate the pairing status.

★ Imagine The Possibilities ★

Collaborate Like Never Before!

Team Activities

Transform routine meetings into interactive team building sessions to get your team involved like never before. The 10 touch points promote multi-user collaboration and allow students and coworkers to interact with the display simultaneously.

Next Level Presentations

Annotate directly on the screen during presentations or lessons and write useful notes for your audience.
Pro Tip: Use shortcut settings on the smart pen to easily control when you're ready for the next slide in your presentation.

Classroom Activities & Training

Captivate students in the classroom by getting them actively engaged in the lesson.
Pro Tip: Take screenshots of your work by double-tapping the shortcut key on the smart pen.

FAQ

From set up to support, we're here to help.

- 1 How does this interactive whiteboard work?**
It uses infrared optical technology and supports up to 10-point multi-touch.
- 2 How do I connect to my computer and projector?**
Wired Version: Your computer is connected via a USB.
Wireless Version: Your computer is connected via a USB and a HDMI connector.
- 3 How do I calibrate my interactive whiteboard?**
You can calibrate through Windows Ink, which is included with Windows 10.
- 4 How do I clean my interactive whiteboard?**
You can use mild soap and water and dry with a clean soft cloth.
- 5 What is the surface and is it durable?**
The surface is a powder-coated aluminum composite and is very durable.
- 6 Can I use my interactive whiteboard on multiple computers or in different rooms?**
Yes. If you have the wireless unit, you must have the transceiver in the line of sight of the interactive whiteboard
- 7 What projector can I use with my interactive whiteboard?**
Any projector will work. You must take into consideration the distance your projector will be from the interactive whiteboard.
