

Double Sided Light Box

Double sided light box

Metal Hanging
Brackets

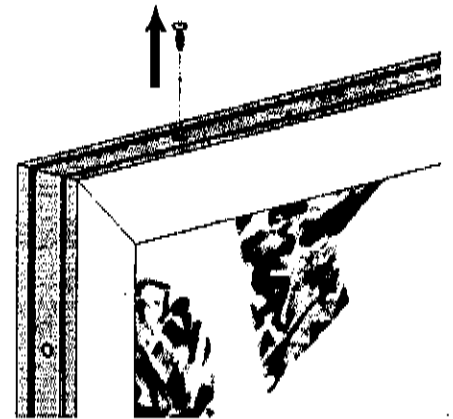

M4 screws

Plastic inserts
(pre installed)

1. Rotate lightbox so that the power cord is in the most convenient location without obstructing view of graphic.

2. Remove the small plastic inserts from the top edge. Simply catch the edge of the cap and pull upward, as shown to the right.

3. Now attach the metal hanger using the provided M4 screw. Insure face of bracket with hanging holes are oriented in same direction as graphic area. Once the brackets are secure the light box is ready for hanging.
