

If short hanger bolts are not attached to bracket(s), here is how to assemble them:

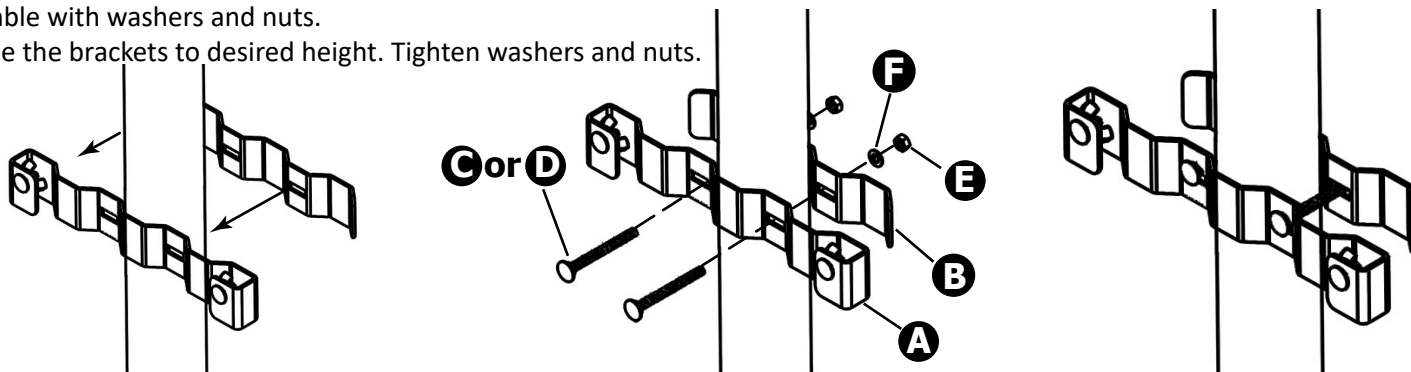

What Is In The Box

A. Bracket A	1
B. Bracket B (same as A for MPBDS)	1
C. M5x55mm Bolt	2
D. M5x80mm Bolt	2
E. M5 Nut	2
F. M5 Washer	2

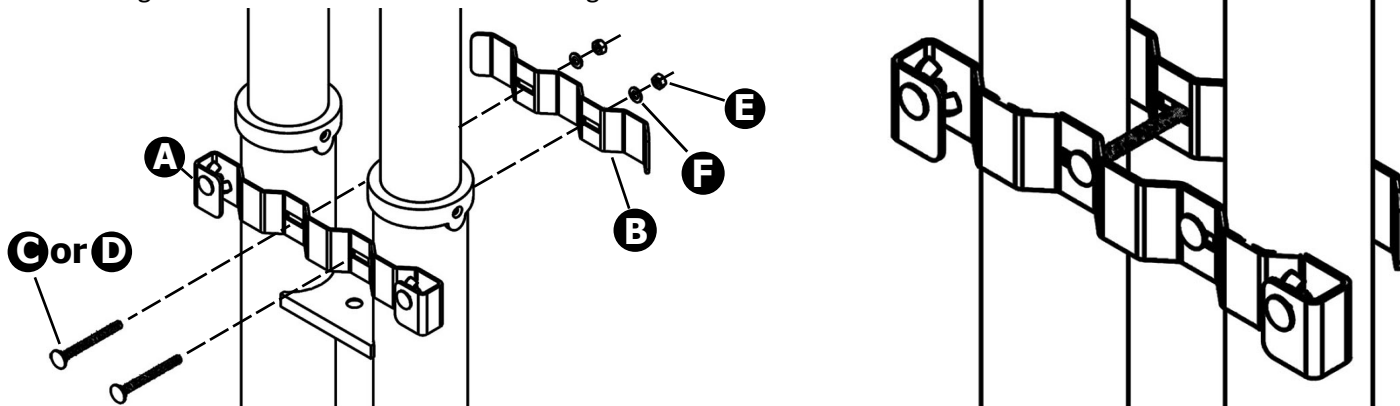

SINGLE POLE

- Sandwich the single pole with 2 brackets as shown below.
- Hold the brackets and insert the bolts through the rectangle slot. Make sure the square section on the bolt fit in the slot. Assemble with washers and nuts.
- Slide the brackets to desired height. Tighten washers and nuts.

DOUBLE POLE Attach to larger diameter tubes:

- Hold both brackets against tubes and insert bolts.
 - Square section of bolt under head must fit into rectangular hole.
 - Secure with washer and nut. Thread first nut only one or two turns before attaching second nut.
 - Then tighten to secure bracket at desired height.
- Loosen hanger bolts if required.
 - Insert head of each hanger bolt into keyhole slot of hanging display.
 - Tighten wing nuts of each hanger bolt.

DOUBLE POLE Attach to small diameter tubes:

- Assemble brackets with one long bolt secured with washer and nut. Secure nut with only one or two turns.
- Rotate, insert and rotate brackets as shown. Secure with second long bolt and washer with nut.
- Tighten at desired height.
