Instructions:

1. Once you have decided on the location you wish to mount your display case, hold the shelf panel (C) against the wall and with a pencil mark the center of the holes on each corner on the wall (this is a reference for later when you begin attaching the panel and standoffs to the wall.)
2. Drill a 1/4" hole into the wall where you have marked with the pencil.
3. Lightly hammer the anchors into each hole in you just drilled.
4. Now hold the shelf panel up to the wall and make sure the anchors and the holes in the panel line up correctly.
5. Take a stand-off and unscrew it's cap; feed a screw into a stand-off and then through a hole in the shelf panel and screw it into the anchor in the wall. Repeat with the other three standoffs.
6. Now that the shelf panel (C) and standoffs (B) are securely mounted to the wall you can arrange the items you wish to display.
7. To attach the front panel (A) simply feed a stand-off cap through a corner hole in the panel and screw it into the stand-off body. Repeat with remaining three stand-off caps.
8. You can now enjoy your beautiful display!

Hardware:

Anchor [x4]

2" Screws [x4]

Standoff [x4]

A - Front Panel

C - Shelf Panel

B - Stand-off
