

TEPAL Assembly Instructions

1. The large black carry case is held together using blue Velcro straps.
2. Remove the center base section of the display from the case.

Begin setup of center section with the Four Panel Base

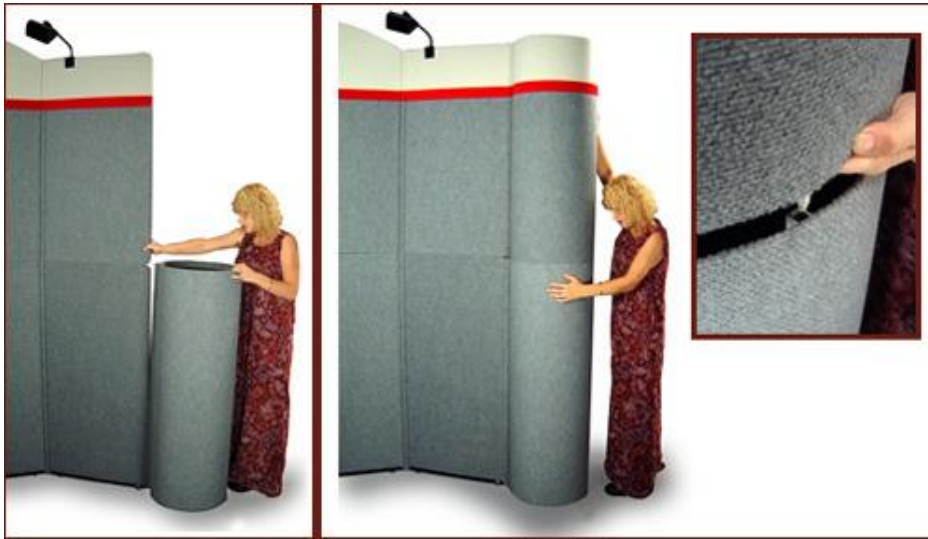

3. Insert stacking guides in all sections of base panel.
4. With the base section in place, lower the upper portion onto base.
5. Swing sides forward.

The blue carry case holds all 4 column pieces. It can be either carried with a soft shoulder strap or pulled by the handle. The case also has wheels for easy transportation.

6. Start with the column pieces flat.
7. Roll the flat flexible panel into a column shape.
8. The magnets along the vertical seam "snap" together to make the flexible panel round.
9. Insert the round panels into each column to offer additional support for their shape.

10. Now the bottom column is ready to be attached to the rest of the display.

(Note: Columns slide onto the panels at the U-Channel.)

11. Next, place the top column piece onto the bottom, guiding the square pins into the square channels to hold in place to keep the columns aligned.

This display can be set up for tiled graphics or poster frames and literature pockets

Remove the base section and columns and use this display as a table top unit.
