Tube Packing Bag ①  
Top & Bottom Tubes

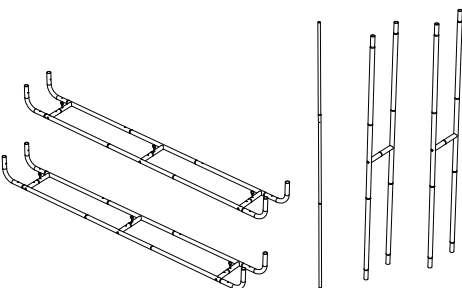

Tube Packing Bag ②  
Side & Center Tubes  
Curved Corner Tubes

### Attention:

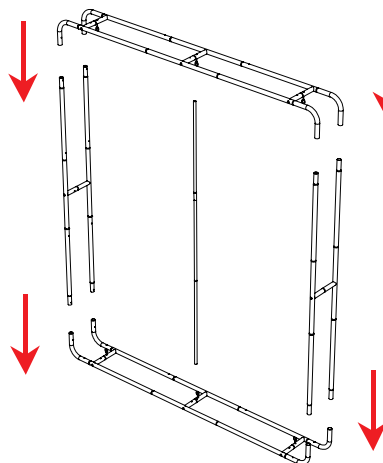

Please switch the LED panels progressively after assembly, this helps avoid an overload of electrical currents. If all the lights are switched at once, then potential damage to the LED panel.

1

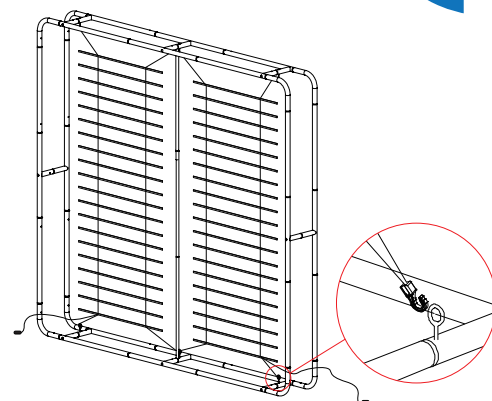

Please connect the tube according to relevant number, which should be connected as in above illustration.

2

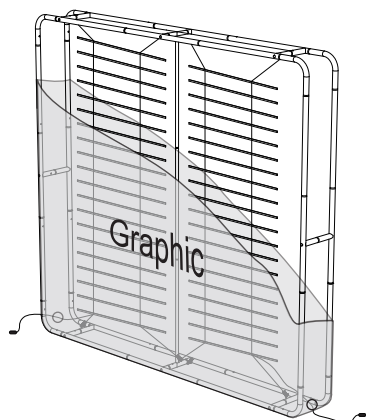

Complete the first step, then install the whole frame with the five parts.

3

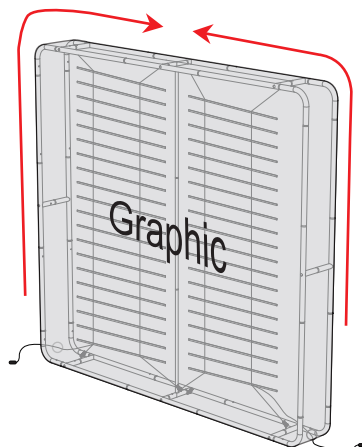

Hang the LED light into frame respectively.

4

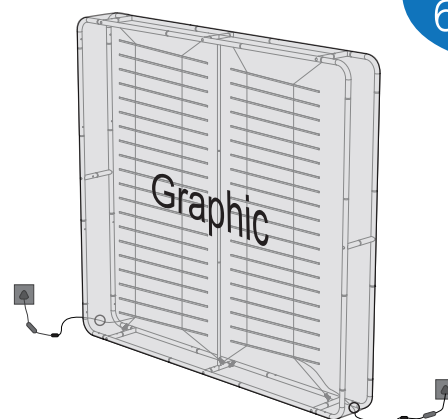

Set up graphic to the frame. (Light power line should be out from holes in graphic.)

5

Zip the zipper.

6

Connect the power to finish.
